Re: Aerus Beyond Guardian Air with ActivePure Technology and Lux Guardian Angel

Dear Joseph,

As the administrator of a skilled nursing facility, I want to thank you, your team, and Aerus for providing our community with pure, clean, and infection-free air!

Parkview Care Center provides skilled nursing, rehabilitation therapies, and memory care to approximately 50 residents, while employing an average of 75 individuals. Infection Prevention has always been very important in a healthcare facility, but with the onset of the COVID-19 pandemic/epidemic, it became critical!

In my research it became evident that clean, purified air would greatly aid us in keeping the COVID-19 virus out of our community. The information provided by Aerus, regarding ActivePure Technology, its capabilities, and benefits made my choice easy.

Parkview purchased 11 Beyond Guardian Air machines with ActivePure Technology for our common areas, dining rooms, hallways, Therapy Gym, and living areas. We also purchased 9 Lux Guardian Angel machines for all Administrative and Nursing offices, Medication Storage Rooms, and Employee Break Areas. Our entire facility is sanitized with ActivePure Technology.

I am pleased to inform you that since the pandemic was declared in early March of 2020, Parkview Care Center has had NO resident contract the COVID-19 virus! I truly believe that the Aerus machines have played a big part in our remaining coronavirus-free!

Please feel free to provide my contact information as a reference for future customers.

Thank you,

Brian G. Hackerott, Administrator
